

MADHAVI KANDULA, M. D.
DERMATOLOGY & COSMETIC DERMATOLOGY

**RADIESSE® POST TREATMENT
CARE INSTRUCTIONS**

- * Apply an ice pack or cold compress to the injection area after treatment to help reduce swelling. If swelling or redness persists too long, please contact our office.
- * It is normal to feel a "firmness" in your injection area for the first few days after your treatment. Over time, the area will soften, leaving you a soft, natural looking result.
- * Many patients return to their normal routine/activities immediately, but you should check with Dr. Kandula for her recommendation.
- * Makeup may be applied shortly after treatment if no complications are present. Apply makeup gently, avoiding strenuous rubbing of the injection area.
- * The injection area may also be gently washed a few hours after treatment, avoiding aggressive scrubbing or rubbing.
- * Immediately report any worsening or persistent symptoms or side effects to our office.
